

TO THE New Patient

OUTLINE OF PROCEDURES FOR CARE

STEP ONE:

All new patients are requested to fill out this personal health history questionnaire.

STEP TWO:

A one-on-one consultation with the doctor will be done to discuss your health problems and to determine what may be the cause.

STEP THREE:

A comprehensive examination and evaluation including those tests necessary to determine the precise cause of your problem is given.

STEP FOUR:

The doctor will advise you if additional laboratory tests or x-rays are needed.

STEP FIVE:

You will be given a Report of Findings at which time the cause of your problem will be discussed. It includes a thorough explanation of

how our treatment works and what results can be obtained. You will also be advised concerning how our office procedures work. If you are accepted for care, treatment will begin.

STEP SIX:

Over the next few visits, treatment will continue as we explain what we are finding. After several visits we will sit down and discuss the care necessary to become as healthy as possible.

STEP SEVEN:

An estimate of the future care that is needed will be given and upon your acceptance, care will continue until the personal maximum correction of your problem has been obtained.

STEP EIGHT:

After maximum correction has been obtained, a schedule of care will be recommended to help prevent future problems and maintain good health.
